

Bodhisattwa Adak

Java Full Stack Engineer | Spring Boot · Microservices · REST APIs · Azure
Kolkata, WB | bodhisattwaadak.official@gmail.com | +91 90514 10527 | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Java Full Stack Engineer with ~3 years at EY GDS building production-grade Spring Boot microservices and REST APIs for large-scale enterprise platforms. Proficient in layered MVC architecture, Spring Security (JWT/RBAC), JPA/Hibernate ORM, and DB-level query optimization. Hands-on with Docker, GitHub Actions CI/CD, and Microsoft Azure. Applied GenAI expertise in RAG pipelines and AutoGen-based agentic workflows as a technical differentiator on a Java-first foundation.

TECHNICAL SKILLS

Backend: Java, Spring Boot, Spring MVC, Spring Security, Microservices, REST APIs, JWT, RBAC, JPA/Hibernate, Maven, Apache Kafka, Redis

Databases: MySQL, PostgreSQL, SQL — pagination, dynamic multi-filter queries, DB-level optimization

Frontend: ReactJS, JavaScript (ES6+), HTML, CSS

DevOps & Cloud: Docker, Kubernetes, GitHub Actions, CI/CD, Microsoft Azure, Azure Container Registry (ACR)

Applied GenAI: Python, LangChain, RAG, AutoGen, MCP, ChromaDB, Azure OpenAI

Testing & Tools: JUnit, Mockito, SonarQube, Swagger/OpenAPI, Postman, IntelliJ IDEA, Git

EXPERIENCE

EY GDS — Associate Software Engineer

Jan 2024 – Present

Java Full Stack Engineer · Enterprise Platform

Jun 2024 – Jul 2025

- Designed and shipped 5+ production Spring Boot REST APIs using layered MVC, DTO/Entity separation, and DB-level Pageable pagination — reducing API error rates by ~30%.
- Implemented JWT-based authentication with Spring Security and RBAC; built dynamic multi-filter JPA query APIs for optimized database-level retrieval; integrated Redis caching to reduce repeated DB hits and improve API response time.
- Established GitHub Actions CI/CD pipelines with Swagger documentation for Docker and Azure dev/prod deployments; delivered ReactJS dashboard components improving UI reusability by ~35%.
- Delivered across Agile sprint cycles — sprint planning, code reviews, and production releases in a large enterprise environment.

Backend Engineer · AI Platform Support — Engine Room / SDLC AI

Aug 2025 – Present

- Enhanced AutoGen-based AI agents and MCP-integrated orchestration workflows; resolved dependency and environment issues across local and cloud deployment stages.
- Managed Azure dev/prod deployments and Docker image pipelines to ACR for 6 production AI agents — reducing deployment inconsistencies by ~35% across release stages.
- Integrated SonarQube scans into GitHub Actions pipelines and automated sonar remediation reports — cutting manual reporting effort by ~50%.

PROJECTS

Enterprise Workforce Management System · Spring Boot · Spring Security · JPA/Hibernate · MySQL · Docker · JUnit · Swagger

- Built RESTful APIs with layered MVC, DTO separation, dynamic multi-filter JPA queries, and DB-level pagination.
- Implemented authentication and authorization using Spring Security and JWT, with Role-Based Access Control (RBAC) to secure application endpoints.
- Containerized with Docker; validated service logic via JUnit/Mockito; documented all endpoints with Swagger/OpenAPI.

AI-Powered SDLC Automation Platform · Python · LangChain · RAG · AutoGen · ChromaDB · Azure OpenAI · Docker · CI/CD

- Built a RAG-based knowledge assistant (LangChain + ChromaDB + Azure OpenAI) across 350+ enterprise documents — achieving ~40% faster contextual search.
- Implemented CI/CD workflows for automated agent deployment and SonarQube report generation across dev and prod.

EDUCATION

B.Tech — Electronics & Communication Engineering · Netaji Subhash Engineering College, Kolkata

2023 · CGPA: 9.31

CERTIFICATIONS

Microsoft Azure AI-900 · IBM AI Essentials V2 · EY AI Engineering Bronze · IBM Data Analytics Essentials
